

CEX vs DEX Perpetual Futures Funding Rates (CEX includes 0.03% daily interest; DEX is premium-only)

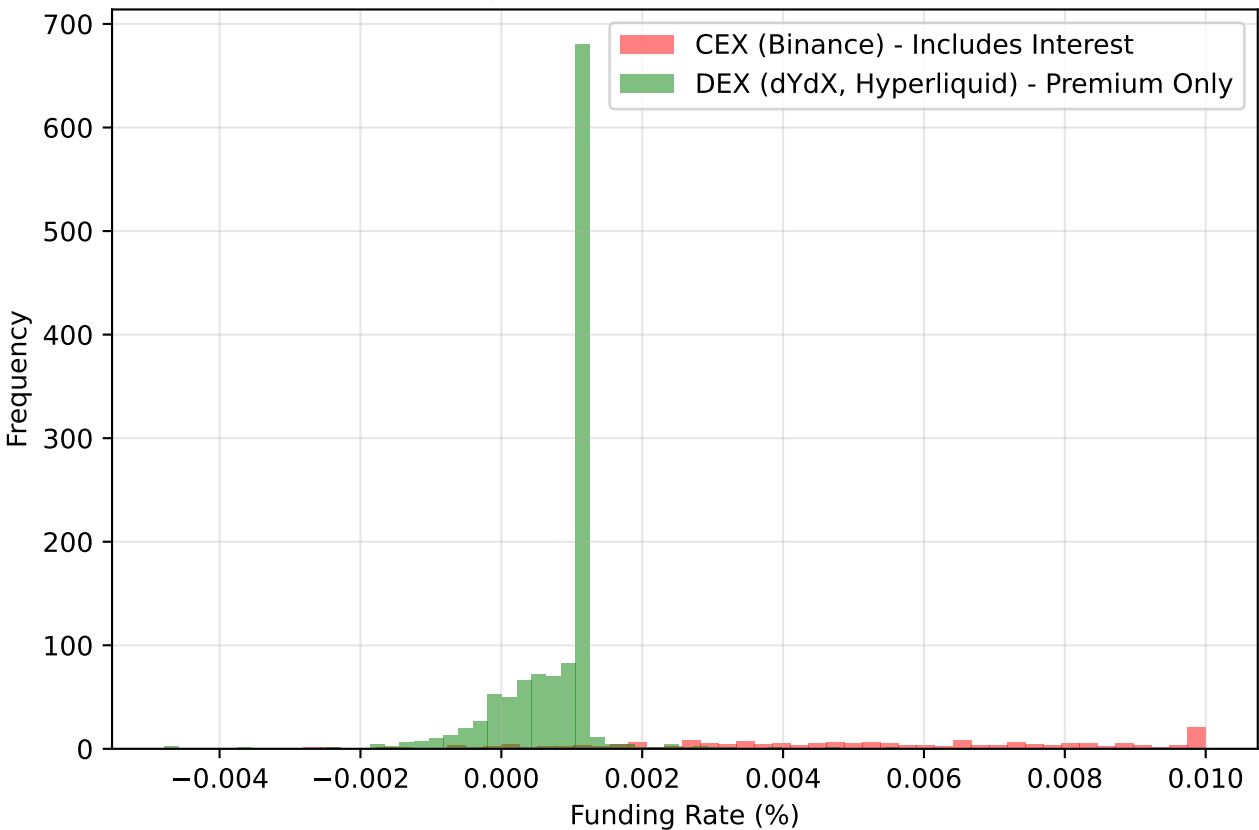

BTC Perpetual Funding Rates

ETH Perpetual Funding Rates

Funding Rate Distribution: CEX vs DEX

KEY FINDINGS FOR ISLAMIC FINANCE ANALYSIS

CEX (Binance) Perpetuals:

- Contains EXPLICIT interest component
- Fixed 0.01% per 8-hour interval (0.03% daily)
- Labeled as "Interest Rate" in documentation
- This constitutes RIBA (prohibited interest)

DEX (dYdX, Hyperliquid) Perpetuals:

- ZERO interest component
- Premium-only funding mechanism
- Based purely on mark-spot divergence
- No fixed interest charge

CONCLUSION:

DEX perpetuals eliminate the explicit riba component present in all CEX implementations.
